chaitanyapatil939@gmail.com

Motivated and detail-oriented tech enthusiast with a strong foundation in web development and cyber security. Adept at creating responsive, user-friendly web applications and ensuring digital assets are secure against evolving threats. Passionate about continuous learning, with hands-on experience in both front-end and back-end technologies, as well as core cyber security principles such as threat detection, vulnerability assessment, and secure coding practices. Looking to contribute technical expertise and a problem-solving mindset to innovative and impactful projects.

Technologies and Languages

- **Programming Languages:** HTML, CSS, JavaScript, C / C++, Python, Shell, SQL, Java
- **Tools:** GitHub, VS Code, Kali Linux
- **Databases:** MySQL

Education

- SYBCA – Kavayitri Bahinabai Chaudhari North Maharashtra University
  2023 – 2027 CGPA: 8.69
- HSC Science - Pratap College, Amalner.
  2021 – 2023 Marks: 69.88 %
- SSC 10th - N. T. munadada, Amalner.
  2020 – 2021 Marks: 88.00 %

Mini Projects

1. Village Library Web Portal
   - *Static Website Project*
   Developed a user-friendly static website for the local village library to help residents easily find available books and track who has currently borrowed them. The system organizes book listings and borrowing information for improved accessibility and transparency in library management.

2. Password Manager (Python)

   Developed a secure password manager application in Python to store, retrieve, and manage user passwords. Implemented encryption techniques (e.g., AES) for secure data storage, ensuring that sensitive information is protected. The application features a user-friendly interface with options to add, update, and delete passwords, with a strong emphasis on security and ease of use.

3. Alarm Software (Python)

   Designed and built an alarm software system in Python to create customizable alarm notifications. The software allows users to set alarms for specific times, with options to include custom sounds and notifications. Integrated a user interface with the ability to set, edit, and cancel alarms. Utilized time-based modules to trigger alarms accurately and efficiently.

4. Circle Clash Game (Python)

   Developed an interactive, 2D Circle Clash game using Python and the Pygame library. The game involves dynamic movement, user-controlled characters, and collision detection mechanics. Implemented various levels, scoring systems to enhance the gaming experience. Focused on game logic, real-time updates, and responsiveness.

5. Multi-Tool Web Application (HTML, CSS, JavaScript)

   Designed and developed a comprehensive multi-tool web application that integrates multiple utility tools within a single interface. The platform includes calculators, unit converters, age calculator, scientific math tools, and other productivity utilities. Implemented a clean and responsive user interface with consistent styling across all tools. Added a favorites feature using localStorage, allowing users to quickly access frequently used tools. Focused on efficient client-side logic, organized code structure, and seamless user experience.

6. Battery Monitor System (Python)

   Designed and developed a real-time battery monitoring system using Python to track system battery status, percentage, charging state, and remaining time. Implemented automated alerts and notifications for low and full battery levels to prevent power-related interruptions and optimize battery health. Integrated system-level modules to retrieve accurate hardware data efficiently. Focused on performance, reliability, and real-time monitoring with a lightweight architecture.

Volunteer Tutor – English & Math (1 Year) At Brilliant Classes

- Taught basic English and Math to 5th-grade students, focusing on building foundational skills in reading, writing, and arithmetic.
- Designed and implemented engaging lesson plans to make learning interactive and fun.
- Assessed student progress and provided personalized support to help them grasp challenging concepts.
- Fostered a positive and encouraging learning environment, improving students' confidence in their academic abilities.
